

Plasmid name: pCAG-HIVgp

Plasmid size: 9852 bp

Note

CAG: Human cytomegalovirus enhancer and chicken β -actin promoter

HIV-1 gp: HIV-1 gag and pol genes

RRE: Rev responsive element

SV40 pA: SV40 polyadenylation signal

Amp pro: Ampicillin resistance (β -lactamase) promoter

SV40 pro & ori: SV40 early promoter and origin

Kan/Neo: Kanamycin/neomycin resistance gene

HSV TK pA: Herpes simplex virus thymidine kinase polyadenylation signal
